Before your actual appointment at the visa office, make sure you have arranged your finances to show the authorities that you have sufficient funds to enable you to complete the full course of studies.

**U.K. visa regulations require you to show a bank account balance for a 28 day period before your visa application. This must cover a consecutive 28-day period ending no more than a month before the date of your application.** (we advise students to make small transactions over the 28 days and not to keep the money static. This is so that the end of the 28 day period is clearly visible on the bank statement).

### **Please make sure your bank statements have the official logo and clearly show your funds.**
